Files Spread for Windows Form - Documentation - Documentation\readme.txt for Windows Form for Windows Form A: You can look into the PowerPoint Interop. This allows you to have a WPF application make a PowerPoint file from a presentation. Q: How to add and remove object type based on checkbox selection? I'm making a configuration application for a JavaScript game, and I'm at a bit of a dead end. I have a configuration screen with a 'Add' and 'Remove' button on the left, and three checkboxes, one for each item in the configuration page. When the 'Add' button is clicked, I wish to add an object of the same name as the checkbox (such as "Object") to a collection. When the 'Remove' button is clicked, I want to remove that object from the collection. Here's my code: Configuration var Collection; \$("#btnAdd").click(function() { var newObject = new Object();

System Requirements:

Windows OS: Windows 7/8/8.1/10 (64-bit) CPU: Intel Core i3-3220, i5-3220, i7-3770, or AMD FX-4170 Processor RAM: 4 GB HDD: 16 GB VRAM: 1024 MB Video Card: AMD Radeon R5 M240 or Nvidia Geforce GTX 770 DX11 DirectX: 11 HD Video: 2048 x 1136 Note: This version is the final release
