Age Calculator is a handy and reliable application that simplifies the way you calculate your current age and then present the result in the most elegant way. All you need to do is to choose the reference year from the drop-down menu and the application will instantly calculate your age in years, months and days. The displayed result is detailed, accurate and requires no tedious input from users. All you have to do is to click the "Get age" button to reveal the result, without any kind of formatting, like dots, commas, years, etc. You can save all your information to the application's database and sync the data with other local users, or you can send the data by e-mail. Moreover, Age Calculator lets you create different

views, including the original one, and enable you to personalize and edit the look and feel of the application. Effortless formula creation Age Calculator offers the user a choice to choose from different reference years, like 1791, 1791, 1792, 1792, 1793, 1793 and so on. This way, you can easily find the age of any individual, regardless of the date of birth. Advanced features Due to the advanced features, Age Calculator is a reliable tool, especially when it comes to calculating average annual ages, along with the mean life span. It can also be used to calculate the age you will reach on any specific birthday, along with the age you will die, if you opt to use the Last Birthday feature. Another important feature of this application is its layered calendar

technology, since it divides the display into several calendars, which can be shown on the screen by clicking on any of the other calendars. This way, the users can select their birthdays, holidays or any other special days, by simply clicking on the first calendar to the right. The result can be displayed in the form of a ring or a circle. You can also use the application to calculate the distance between any two specific dates, or the number of years, months and days between two dates. The ultimate goal is to simplify the way you calculate your age, which is often very troublesome. Age Calculator lets you easily set the number of the day that the application is going to show the age, along with the number of the month and the year you want to display. Furthermore, it is possible to

choose from a variety of time display modes, like 24h, 12h, AM/PM, AM, PM, AM/
